IMPERIAL CHINESE LION DANCERS & WU SHU SWORD FIGHTERS

The Chinese Lion is a mythological creature that represents **strength, wisdom and good luck; and has the ability to drive away evil spirits.** The dance has its origins in ancient times when, it is said, a monster used to descend from the mountains on the first day of the lunar year and destroy villages and crops before returning to its lair. In order to protect themselves, the people

built as terrifying a creature as they could and went with it to confront the monster as it came to their village. Upon seeing the Lion, the monster became so frightened that it never returned to trouble anyone ever again.

In modern times the Lion is still used on the Lunar New Year to bring good luck and prosperity to everyone. It is also used at the opening of businesses, weddings, parades, birthdays and the start of any major undertaking.
